DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/16/05 has been entered.

This application is in condition for allowance except for the following formal matters:

Drawings

1. The drawings are no longer objected to. None of the claimed "memory unit", "test recording unit", optimum tracking offset determination unit" are found in the submitted drawings. – See below objection to claims. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the above indicated "units" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 2656

Claim Objections

Claims 10-15 are objected to because of the following informalities: the terms "memory unit", "test recording unit", and "optimum tracking offset determination unit" are not readily apparent from the remainder of the specification. Applicant is reminded of the requirements of 37 CFR 1.75 (d) (1). Appropriate correction is required.

The examiner interprets:

"memory unit" as --- optical disk ---- and the remaining object to "units" as --- microcomputer ---.

It is recognized that terms need not be found verbatim, nevertheless since there must be a correspondence with the claimed terms and the remainder of the specification – see above noted 37 CFR 1.75 (d) (1) – applicants' cooperation in properly identifying such "units" to ensure a proper interpretation of the scope of the invention is respectfully requested.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

Claims 10-15 are allowed. None of the cited prior art teaches or discloses the ability predicated upon the various rotation modes and the relationship with the tracking offset value and optimum determining as presented in independent claims 10 and 13.

Art Unit: 2656
